Dharan, Sunsari, Nepal | 986-xxxxxx | sthaprashant0308@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year BIT student, looking to contribute meaningfully to the tech environment of Nepal through crafting excellent system architecture and UI/UX for maximum user satisfaction and interactivity.

EDUCATION

- **Central Campus of Technology | Dharan, Nepal** 2022 - Present
Bachelors in Information Technology
- **Dharan Adarsha Higher Secondary Boarding School | Dharan, Nepal** 2020 - 2022
+2 in Computer Science

RELEVANT EXPERIENCE

Workshop Mentor | Siddhartha Shishu Sadan Feb 2026 - Mar 2026

Led a 10 days web development workshop for Grade 7-9 students

- Taught **HTML**, **CSS** and **JavaScript** fundamentals from scratch.
- Guided students in converting their web project into mobile app using **Capacitor.js**

PROJECTS

Trek-It (Final Year Project) ([Source](#))

Guide booking platform for Nepal tourism market

- Built the entire full-stack application with **Next.js** frontend, **Node.js/Express.js** backend and **MongoDB** as the database along with cloudinary as media storage.
- Implemented real-time chat system using **socket.io** and **socket.io-client**.

Personal Art Portfolio (Personal Project) ([Source](#))

A dynamic visual arts portfolio website where I showcase my own artworks.

- Pre-planned UI/UX for the project with key focus on responsive layout and user accessibility.
- Built using **React.js** frontend, **Node.js/Express.js** at backend and **MongoDB** database.

Live Reload CLI (Personal Project) ([Source](#))

A lightweight CLI tool that mimics VS Code's Live Server extension

- Built a Node.js/Express server that accepts a file or directory path via a CLI using **yargs**, auto-resolving to index.html when a directory is passed.
- Implemented live-server using **Server-Sent Events (SSE)** and **fs.watch**, injecting a small script to the served HTML to trigger automatic page refresh on file changes.

FPager (Personal Project) ([Source](#))

A small utility tool developed to quickly create a front page for BIT/CSIT practical assignments at CCT, Dharan.

- Built a **React** frontend using **Zustand** for state management and **Tailwind** for styling, dynamically populating semester and subject data from structured JSON.
- Implemented one-click export of the generated cover page as a downloadable image using **html2canvas** JavaScript library, removing manual formatting work for students.

SKILLS & TOOLS

Languages (by proficiency): JavaScript, Java, .Net(dotNet), php

Libraries and Frameworks: React.js, Next.js, Node.js/Express.js, Tailwind CSS, Framer Motion, Zustand, TanStack Query, Socket.io, MongoDB

Tools and Platforms : Git/GitHub, Cloudinary, Figma, Postman

Soft Skills: Leadership, Adaptability, Visually creative, Critical thinking, Time management, Problem Solving.

Communication: English (C1 – British Council Assessment), Nepali (Native)
